Introduction

NTU Aquathlon was established as a university sports team in 2010 by like-minded and passionate individuals. Since then, our team has grown in number and experience. We currently have 30 active members and 7 years of alumni in the team.

Nanyang Technological University Enduro (NTURO) utilises race concepts from Super League Triathlon. This event was initiated by two of our final year athletes with the aim to share the joys of multisport racing with the community.

Objective

NTURO will be the first race in Singapore to offer participants a swim-run race in an enduro race format. Participants will complete three sets of swim-runs back-to-back reinforcing the need for speedy and efficient transitions.

Participants include multisport club members from the local universities, polytechnics and the rest of the Singapore community. The event also provides a platform for budding athletes to experience multiport racing and push beyond their limits. NTURO also fosters a greater sense of community by bringing like-minded, passionate individuals together through racing.

NTU Aquathlon at Singapore University Games 2018
